## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Taylor (US 5027872).

Taylor teaches a fluid storage apparatus. The apparatus comprises a first container/can (6) having a first chamber (7) capable of being filled with a fluid/paint. The apparatus further comprises a second container (2) having a second chamber (3) adapted to receive fluid from the first chamber (7). The second container having a piston (18) means slideably receivable within the first chamber (7) of the first container (6), wherein, on insertion of the piston (18) means into the first chamber (7) of the first container (6), fluid is displaced from the first chamber (7) to the second chamber (3). (See Figures 1 and 2)

 Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Paoletti (US 4573506).

Paoletti teaches a fluid storage apparatus. The apparatus comprises a first container (220) having a first chamber capable of being filled with a fluid. The apparatus further comprises a second container (210) having a second chamber adapted to receive fluid from the first chamber. (See Figures 11 and 12) The second

Application/Control Number: 10/727,713

Art Unit: 1743

container having a piston (13) means slideably receivable within the first chamber of the first container (220), wherein, on insertion of the piston (13) means into the first chamber of the first container (220), fluid is displaced from the first chamber to the second chamber. (See Figures 11 and 12) The piston means (13) and the second container (210) are integrally formed. (See Figure 10). The piston means (13) has a bore (15) that fluidly communicated with the first and second chambers. The bore (15) has a first portion having a first diameter which is adjacent to the second chamber and a second portion having a second diameter which is smaller than the first diameter which is remote from the second chamber. (See Figures 1 and 2) Paoletti does not explicitly disclose these limitations. However, it is inherent that the bore (15) of the piston means (13) will have a first portion having a first diameter which is adjacent to the second chamber and a second portion having a second diameter which is smaller than the first diameter which is remote from the second chamber because the shape of the piston means (13) is conical. The apparatus further teaches sealing means (23) adapted to seal the first (220) and second containers (210) together as the fluid is displaced to the second chamber (210). (See Figures 3-5 and 11-12) The apparatus further comprises cutting means (70) adapted to remove a part of the apparatus such that the stored fluid may be removed from the second container (210). The fluid storage apparatus is disposable.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jyoti Nagpaul whose telephone number is 571-272-1273. The examiner can normally be reached on Monday thru Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
